

MYTH: Speaking hands-free is safe to use while driving

REALITY

Drivers talking on cell phones can miss seeing up to 50% of their driving environments, including pedestrians and red lights.

Try Reading This...

You're four times more likely to have a traffic crash when you're on a mobile phone.
It's hard to concentrate on two things at the same time.

Credit: National Highway Traffic Safety Administration

Two at once? No. Your brain deals with one thinking task at time.
