

Distraction-Free is the Way to Be!

DONUT
DRIVE
DISTRACTED

PLEASE, have your breakfast **BEFORE** you get behind the wheel.

txdrivingconcern.org

Any non-driving activity you engage in is a potential distraction and increases your risk of crashing.

Drivers talking on cell phones can miss seeing up to 50% of what is in their driving environment, including pedestrians and traffic signals.

Sending or reading a text takes your eyes off the road for at least 5 seconds. At 55 mph, that's like driving the length of an entire football field with your eyes closed.
